

sedia/chair
design Giulio Iacchetti
2013

Sedia interamente costruita in faggio massello. Stia trae ispirazione dalla forma archetipica della seduta da osteria. Introduce nel disegno della struttura dettagli preziosi come l'innesto dello schienale sui ritti posteriori e il gioco dei traversi sotto il sedile, che, incrociandosi, generano un'imprevista ed elegante soluzione strutturale.

A chair made entirely of solid beech wood, Stia is inspired by classic Italian "osteria" (tavern) chairs. Its carefully-crafted detailing can be seen throughout the structure, such as in the backrest mounted on the rear uprights and the intersecting crosspieces under the seat, which create an unexpected, elegant structural solution.
