Tetris è un sistema di mobili contenitori modulari e componibili. Combinando gli elementi a terra con quelli in appoggio si possono creare inedite possibilità di configurazione e utilizzo. Il design di Tetris si ispira ai viaggi e allo studio dell’architettura costruttivista russa ed in particolare a quella di K.S. Melnikov.

Tetris is a system of modular storage cabinet components. Combining the floor units with stacked modules, the system offers great versatility of configuration and use. The design of Tetris takes its cue from travels, and the study of Russian Constructivist architecture, especially that of K.S. Melnikov.
